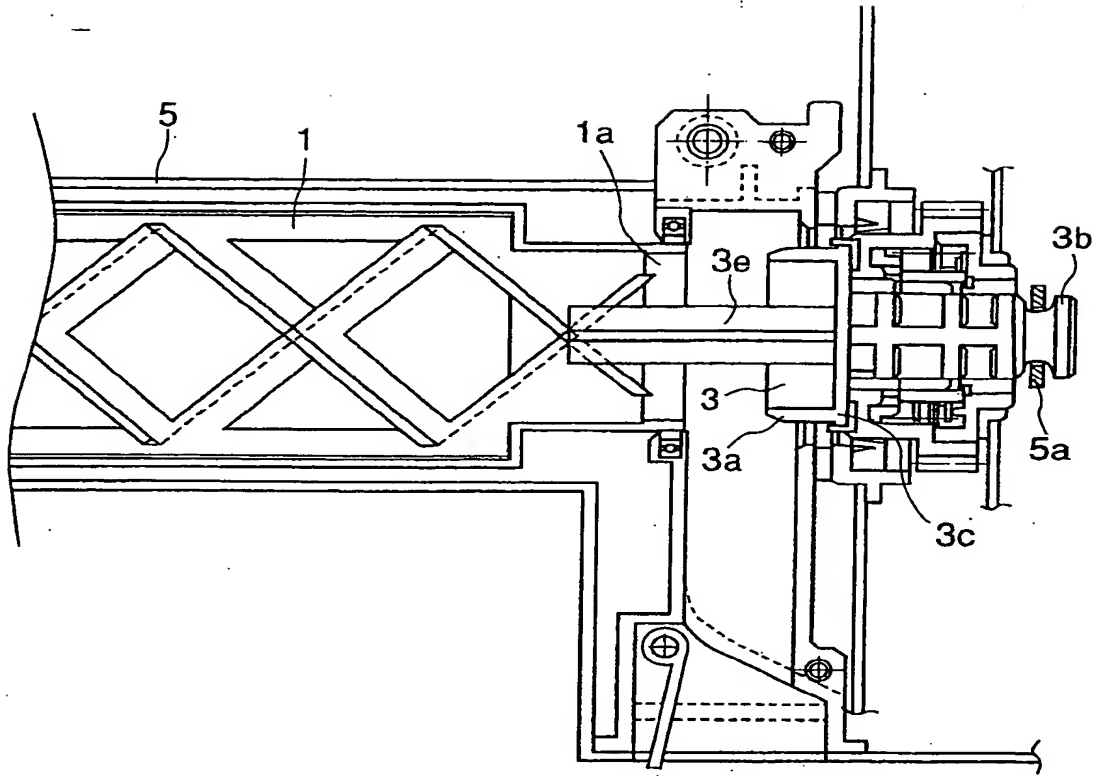

FIG. 4

This cross-sectional view shows a container assembly. A main body (2a) is connected to a handle (2f) at the bottom. The top of the body is covered by a lid (2b). The lid is secured by a locking mechanism (4) which includes a latch (4a) and a lock (4b). The lid is also equipped with a gasket (2c) and a seal (2d). The interior of the container is divided into a main compartment (6) and a smaller compartment (7) by a partition (1j). The partition is supported by a base (1i) and a top (1h). The entire assembly is housed within a frame (2g).
